PROFESSIONAL SUMMARY

Computer Science Engineering student with strong interest in software development, web technologies, and data analytics. Seeking entry-level opportunities to apply technical skills, problem-solving abilities, and contribute to real-world projects. Passionate about continuous learning and building innovative solutions through collaborative teamwork.

EDUCATION

B.E.Computer Science and Engineering

(2023 - Present)

St.Peter's College of Engineering and Technology

CGPA: 8.43

HSC

(2023)

Leo Matriculation Higher Secondary School

Percentage : 83.3

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, SQL

Web Technologies: HTML5, CSS3

Tools & Platforms: Git, VS Code, Excel, Figma

Database: MySQL

PROJECT WORK

Bank Management System

- Developed a banking application with account and transaction management features.
- Implemented relational database concepts using primary and foreign keys.
- Applied basic encryption techniques for secure data handling.

Event Web Portfolio

- Built responsive event website using HTML, CSS, and JavaScript.
- Implemented DOM manipulation and dynamic UI updates.
- Improved maintainability through modular structure.

INTERNSHIP

Marcello Tech | Data Science Intern

Sep 2024

- Worked on data preprocessing using Python and Pandas.
- Created visualizations using Matplotlib and Seaborn.
- Applied basic machine learning models using Scikit-learn.

CodingMissions IT Solutions | Python Programming Intern

Aug 2025

- Completed internship training in Python programming and problem-solving concepts.
- Worked on core Python topics including variables, loops, functions, and file handling.
- Gained hands-on exposure to real-time programming practices and debugging techniques.

CERTIFICATIONS

- Python Developer Path - MongoDB
- Microsoft Azure Fundamentals - Microsoft
- Complete Intro Web Development - Frontend Masters
- AI Fundamentals - IBM Skillsbuild
