PROFESSIONAL SUMMARY

Computer Science Engineering student with hands-on experience in **Python, Java, SQL, web development, software testing, and database management** through academic projects and internships. Strong foundation in **programming fundamentals, data structures, debugging, testing, and problem solving**. Experienced in developing web applications, working with databases, and applying testing and automation concepts. Familiar with **AI/ML fundamentals, software development lifecycle, and workflow automation**. Seeking an entry-level opportunity to contribute to software development, testing, and application engineering.

EDUCATION

B.E.Computer Science and Engineering

(2023 - 2027)

St.Peter's College of Engineering and Technology

CGPA: 8.42

HSC

(2023)

Leo Matriculation Higher Secondary School

Percentage : 83.33

TECHNICAL SKILLS

- **Programming Languages:** Python,Java, JavaScript, SQL
- **Data & Database:** MySQL, Relational Database Concepts, Data Handling
- **Software Testing:** Manual Testing, Test Case Design, Debugging, Automation Testing, Automated Test Framework (ATF)
- **Python & Data Libraries:** NumPy, Pandas, Scikit-learn , Tensorflow
- **Web Technologies:** HTML5, CSS3 , JavaScript
- **Tools:** GitHub, VS Code, Postman, ServiceNow
- **Core Skills:** Problem Solving, SDLC, Testing, Teamwork, Communication, Adaptability

PROJECT WORK

Farm Assist – Smart Agriculture Assistant

- Developed an AI-powered web application to assist farmers with crop and plant management.
- Implemented plant disease detection and crop recommendation features using Python , Tensorflow and machine learning concepts.
- Worked with data handling and machine learning approaches to support prediction-based agricultural assistance.
- Designed a user-friendly interface with HTML, CSS, and JavaScript and integrated a MySQL database for data management

Bank Management System

- Designed and developed a banking management system using Python and MySQL for account and transaction management.
- Implemented secure data handling using relational database concepts and basic encryption techniques.
- Collaborated during project development, testing, and debugging to improve application reliability and performance.

INTERNSHIP

Weedo Infotech | Full Stack Development Intern

May 2026 - Jun 2026

- Developed web applications using Java and full-stack development concepts.
- Worked with front-end and back-end technologies to build responsive applications.
- Gained hands-on experience in software development, debugging,testing and project implementation.

NSIC Technical Services Centre |Automation Testing with Scripting - Trainee

Aug 2026 – Sep 2026

- Completed training in Automation Testing with Scripting under the ATI Scheme of MSME.
- Gained practical exposure to software testing, test automation, and scripting concepts.
- Successfully completed the training with an A1 grade.

CERTIFICATIONS

- AI Fundamentals - IBM Skillsbuild
- ServiceNow Administration Fundamentals & Flow Designer – ServiceNow University
- Python Developer Path - MongoDB
- Microsoft Azure Fundamentals - Microsoft
- Complete Intro Web Development - Frontend Masters
